Introduction to the Equality Delivery System2 (EDS2)

The EDS2 was first launched by the NHS Equality and Diversity Council in 2011 and was refreshed as EDS2 in November 2013. Although it is not a legal requirement, EDS2 allows the CCG to clearly evidence what actions they are taking as a commissioning organisation to address equality and health inequality issues which are part of the responsibilities under the Health and Social Care Act 2012. Also, it is expected by NHS England (NHSE) that all CCGs will continue to implement it as a mandatory requirement. From April 2015, EDS2 implementation by NHS organisations was made mandatory in the NHS standard contract.

There are four sections: population health outcomes, individual patient experience, supported workforce and inclusive leadership. The key role of CCGs is to work with partners to improve the health and well-being of its population. Over time, the various improvements in health care services, social care, public health, wider environmental and economic factors have served to significantly improve the population's life expectancy and health status. This subsequently means that CCG's as commissioners of health care services have statutory and moral responsibility to put in place measures to improve potential patient and patient experience and satisfaction levels with, the healthcare services they commission for them.

The EDS2 framework was designed by the NHS to support NHS commissioners and providers to meet their duties under the Equality Act. The EDS2 has four goals, supported by 18 outcomes as detailed in the table below. NHS Wolverhampton CCG has used the EDS2 as a tool kit to meet the requirements (Public Sector Equality Duty) under the Equality Act 2010 and in discussion with local partners including local populations, review and improve their performance for people with characteristics protected by the Equality Act 2010. Furthermore we have linked the EDS to Human Rights, listed below are the Articles.

The **Equality Act 2010** requires all Clinical Commissioning Groups (CCGs) to annually publish information which demonstrates their performance and progress against the requirements of the Public sector Equality Duty (PSED), for people with characteristics protected by the Equality Act 2010. The nine characteristics are as follows:

- Age
- Disability
- Gender re-assignment
- Marriage and civil partnership
- Pregnancy and maternity
- Race (national and ethnic origin)
- Religion or belief
- Sex
- Sexual orientation

Other disadvantaged groups include people who are:

- Homeless
- Live in poverty
- Stigmatised groups i.e. prostitution
- Misuse drugs
- Geographically isolated

The EDS2 was developed by the NHS for the NHS to help NHS organisations, in discussion with their local partners and local people, review and improve their performance in respect of people with a protected characteristic.

The **EDS2 framework** identifies four over-arching goals with 18 outcomes.

1. Better health outcomes for all
2. Improved patient access and experience
3. A representative and supported workforce
4. Inclusive leadership.

Human Rights

Human rights and principals of equality should never be a secondary consideration in the provision of NHS services or in the development of the workforce. The five principles are referred to as FREDA:

- **F**airness – at the heart of recruitment and selection processes (Goal 3)
- **R**espect – making sure complaints are dealt with respectfully (Goal 2)
- **E**quality – underpins commissioning (Goal 1)
- **D**ignity – core part of patient care and the treatment of staff (Goal 2 & 3)
- **A**utonomy – people should be involved as they wish to be in decisions about their care (Goal 2)
(Goal 4 would be a golden thread as part of all outcomes)

These have been developed to provide general principles that NHS should aspire to.

The Public Sector Equality Duty (PSED)

Using the EDS2 will help organisations respond to the PSED, and demonstrate their continued activities to meet the requirements to:

- eliminate unlawful discrimination;
- advance equality of opportunity between different groups and;
- foster good relations between different groups;

| The goals and outcomes of EDS2 | | |
|--|--------|---|
| Goal | Number | Description of outcome |
| Better health outcomes | 1.1 | Services are commissioned, procured, designed and delivered to meet the health needs of local communities |
| | 1.2 | Individual people's health needs are assessed and met in appropriate and effective ways |
| | 1.3 | Transitions from one service to another, for people on care pathways, are made smoothly with everyone well-informed |
| | 1.4 | When people use NHS services their safety is prioritised and they are free from mistakes, mistreatment and abuse |
| | 1.5 | Screening, vaccination and other health promotion services reach and benefit all local communities |
| Improved patient access and experience | 2.1 | People, carers and communities can readily access hospital, community health or primary care services and should not be denied access on unreasonable grounds |
| | 2.2 | People are informed and supported to be as involved as they wish to be in decisions about their care |
| | 2.3 | People report positive experiences of the NHS |
| | 2.4 | People's complaints about services are handled respectfully and efficiently |
| A representative and supported workforce | 3.1 | Fair NHS recruitment and selection processes lead to a more representative workforce at all levels |
| | 3.2 | The NHS is committed to equal pay for work of equal value and expects employers to use equal pay audits to help fulfil their legal obligations |
| | 3.3 | Training and development opportunities are taken up and positively evaluated by all staff |
| | 3.4 | When at work, staff are free from abuse, harassment, bullying and violence from any source |
| | 3.5 | Flexible working options are available to all staff consistent with the needs of the service and the way people lead their lives |
| | 3.6 | Staff report positive experiences of their membership of the workforce |
| Inclusive leadership | 4.1 | Boards and senior leaders routinely demonstrate their commitment to promoting equality within and beyond their organisations |
| | 4.2 | Papers that come before the Board and other major Committees identify equality-related impacts including risks, and say how these risks are to be managed |
| | 4.3 | Middle managers and other line managers support their staff to work in culturally competent ways within a work environment free from discrimination |

Articles of the European Convention on Human Rights

The key human rights articles have been considered:

- Article 2 Right to life
 - Article 3 Freedom from torture and inhuman or degrading treatment
 - Article 4 Freedom from slavery and forced labour
 - Article 5 Right to liberty and security
 - Article 6 Right to a fair trial
 - Article 7 No punishment without law
 - Article 8 Respect for your private and family life, home and correspondence
 - Article 9 Freedom of thought, belief and religion
 - Article 10 Freedom of expression
 - Article 11 Freedom of assembly and association
 - Article 12 Right to marry and start a family
 - Article 14 Protection from discrimination in respect of these rights and freedoms
-
- Protocol 1, Article 1 Right to peaceful enjoyment of your property
 - Protocol 1, Article 2 Right to education
 - Protocol 1, Article 3 Right to participate in free elections
-
- Protocol 13, Article 1 Abolition of the death penalty

Wolverhampton CCG Equality Objectives

1. To ensure that Leadership and Governance arrangements persist in offering high level assurance of equality.
2. Equality approaches are effectively included in key mechanisms of commissioning (such as business case development, procurement, contracting).
3. Equality Analysis becomes part of our organisational processes so that projects, policies, strategies, business cases, specifications and contracts have all been developed in consideration of equality, diversity and human rights issues.
4. To apply Goals 1 and 2 of the Equality Delivery System to an average of at least three patient pathways for each year of the strategy, and to demonstrate year on year improvements for Goals 3 and 4 (Staff and Leadership).
5. To regularly review and update the strategic action plan and equality objectives (on at least an annual basis) to ensure that it is providing appropriate targets for development and improvement.
6. To ensure all CCG staff receive basic training to ensure awareness of Equality Act 2010 responsibilities and the NHS Constitution, and that specific training on Equality Analysis and the Equality Delivery System is targeted to all staff who are involved in these processes.
7. To ensure that Equality and Diversity forms an ongoing part of our leadership and organisational development programmes.
8. To ensure that Equality and Diversity approaches are fully included in our engagement of people who use services and in our work with strategic partners and other stakeholders.
9. Improve accessibility of information and communication for people from statutorily 'protected groups' and other disadvantaged

Vision

“Our vision is to provide the right care in the right place at the right time for all of our population. Our patients will experience seamless care, integrated around their needs and they will live longer with an improved quality of life”

Wolverhampton CCG wants everybody to receive the highest quality and appropriate care for their needs, delivered from the right service, when the patient needs it. The CCG have a range of strategies to help us achieve this. Some might mean the CCG look to change how services work in order to meet the current needs and expectations of local patients. Others, for example, will look to helping patients make the right decisions about getting care. An example of this is the CCG’s 'choose well' campaign, which you may have seen on buses and in newspapers. This aims to inform patients of all the urgent and emergency care options available to them.

CCG region

Overview of CCG population information

Wolverhampton CCG is committed to design and implement policies, procedures and commission services that meet the diverse needs of the local population and workforce, ensuring that none are placed at a disadvantage over others. As the leader of the local NHS, Wolverhampton CCG, are responsible for spending almost £1m a day on healthcare for the city's 262,000 registered patients. The CCG commission (buy and monitor) everything from emergency/A&E care, routine operations, community clinics, health tests and checks, nursing homes, mental health and learning disability services. As a commissioner, it is the role of the CCG to ensure that the services brought from the many providers of care, including The Royal Wolverhampton NHS Trust and Black Country Partnership Foundation Trust is of the highest quality and appropriate for the health needs of our city. Wolverhampton CCG, are a clinically-led organisation comprising of 46 member GP practices within the city. This means that local family doctors can use all their experience of the needs and wishes of local patients to make decisions about local health services.

Wolverhampton is one of the 4 local authorities in the Black Country sub-region. Wolverhampton has a documented history dating back to 985AD. In 2000, Wolverhampton was granted city status. The first Census in 1801 shows Wolverhampton’s population as 12,500, in 1901 94,187 and by 1951 the population stood at 162,672. Wolverhampton is now one of the most densely populated local authority areas in England, with a population of 249,470 people (Census 2011) living in its 26.8 square miles, equating to a population density of 3,447 per square kilometre. The latest Indices of Deprivation (2010) indicates that Wolverhampton is more deprived than it was three years ago and represents a relative decline, from the 28th most deprived to the 20th most deprived local authority (out of 326 local authorities). The equalities profile of the borough focuses on the following:

| Age Band | All people in this group | % |
|----------------|--------------------------|------|
| All categories | 249,470 | N/A |
| Aged 0 – 15 | 49,423 | 19.8 |
| Aged 16 – 49 | 118,233 | 47.4 |
| Aged 50 – 64 | 41,185 | 16.5 |
| Aged 65+ | 40,629 | 16.3 |

- The child population fell from 49,501 in 2001 to 49,423 in 2011, a 0.15% fall
- The older people population rose from 39,985 in 2001 to 40,629 in 2011, a 1.6% rise
- The working-age population rose from 147,096 in 2001 to 159,418 in 2011, a 8.4% rise

| Disability | All people in this group | Limited a lot or a little (%) | Not limited |
|------------------------------|--------------------------|-------------------------------|-------------|
| All people | 249,470 | 20.5 | 79.5 |
| Male | 123,441 | 18.8 | 81.2 |
| Female | 126,029 | 22.2 | 77.8 |
| Aged 0 – 15 | 49,423 | 4.3 | 95.7 |
| Aged 16 – 49 | 118,233 | 10.3 | 89.7 |
| Aged 50 – 64 | 41,185 | 30.0 | 70.0 |
| Aged 65+ | 40,629 | 60.7 | 39.3 |
| White (British, Non-British) | 169,682 | 23.3 | 76.7 |
| Mixed | 12,784 | 10.4 | 89.6 |
| Asian | 44,960 | 15.2 | 84.8 |
| Black | 17,309 | 16.6 | 83.4 |
| Other” ethnicity | 4,735 | 14.7 | 85.3 |

| Gender | All people in this group | Male (%) | Female (%) |
|------------------------------|--------------------------|----------|------------|
| All people | 249,470 | 49.5 | 50.5 |
| Aged 0 - 15 | 49,423 | 51.3 | 48.7 |
| Aged 16 – 49 | 118,233 | 50.4 | 49.6 |
| Aged 50 – 64 | 41,185 | 50.0 | 50.0 |
| Aged 65+ | 40,629 | 44.1 | 55.9 |
| White (British, Non-British) | 169,685 | 48.8 | 51.2 |
| Mixed | 12,784 | 49.3 | 50.7 |
| Asian | 44,960 | 51.5 | 48.5 |
| Black | 17,309 | 49.0 | 51.0 |
| “Other” ethnicity | 4,735 | 57.4 | 42.6 |

| Race (Ethnicity) | All people in this group | % |
|-------------------|--------------------------|------|
| White British | 160,945 | 64.5 |
| White Non-British | 8,737 | 3.5 |
| Mixed | 12,784 | 5.1 |
| Asian | 44,960 | 18.1 |
| Black | 17,309 | 6.9 |
| “Other” ethnicity | 4,735 | 1.9 |
| Total *BME | 88,525 | 35.5 |

| Race (Ethnicity) | All people in this group | White British (%) | BME (%) |
|------------------|--------------------------|-------------------|---------|
| All people | 249,470 | 64.5 | 35.5 |
| Male | 123,441 | 63.5 | 36.5 |
| Female | 126,029 | 65.5 | 34.5 |
| Aged 0 – 15 | 49,423 | 55.3 | 44.7 |
| Aged 16 – 49 | 118,233 | 58.6 | 41.4 |
| Aged 50 – 64 | 41,185 | 74.8 | 25.2 |
| Aged 65+ | 40,629 | 82.7 | 17.3 |

| Religion | All People in this group | % |
|---------------------|--------------------------|------|
| All people | 249,470 | N/A |
| Christian | 138,394 | 55.5 |
| No Religion | 49,821 | 20.0 |
| Sikh | 22,689 | 9.1 |
| Religion not stated | 16,052 | 6.4 |
| Hindu | 9,292 | 3.7 |
| Muslim | 9,062 | 3.6 |
| Other religion | 3,057 | 1.2 |
| Buddhist | 1,015 | 0.4 |
| Jewish | 88 | 0.0 |

| Marital Status | All people in this group | % |
|--|--------------------------|------|
| Single (Never married or never in a registered civil partnership) | 74,231 | 37.1 |
| Married | 87,288 | 43.6 |
| Registered Civil Partnership | 319 | 0.2 |
| Separated (but still legally married or still in civil partnership) | 5,390 | 2.7 |
| Divorced or formerly in a civil partnership which is now legally dissolved | 17,078 | 8.5 |
| Widowed or surviving partner from civil partnership | 15,741 | 7.9 |

43.8% of all residents aged over 16 were either married or in a civil partnership

All information is based on the last census 2011 but provides a really good picture of the diverse community that Wolverhampton CCG serves.

Population Projections estimate the city's population will be 273,300 by 2037, an 8.9% rise from their baseline 2012 figure of 251,000. The balance of the population will change: an increase in the number of children, but fewer working-age people, and elder people. Slightly increasing birth rates, and inflow of migration greater than outflow, are important aspects of population growth, but decreasing mortality rates and longer life expectancies point to a steadily aging population overall. Services need to be planned to meet future need.

Overview of CCG health inequalities

A focus on reducing health inequalities

Unacceptable gaps in health exist across Wolverhampton. A baby born today in Bilston can expect to live seven years less than somebody born in Tettenhall. Improving the health of the entire city and reducing health inequalities is very important. The NHS has a key role to play in both treating people when they are ill or injured, and keeping people healthy. In partnership the CCG work with the Public Health team, who are within the City of Wolverhampton Council and together they work hard to promote healthy lifestyles and commission services that help people to make healthier lifestyle choices.

In order for Wolverhampton CCG to tackle the biggest health challenges in the city, three priorities have been identified which are:

1. Dementia - We are aiming to increase the numbers of dementia patients who are able to stay at home for longer, keeping them out of hospital.
2. Diabetes – The CCG aim to reduce the number of avoidable admissions to A&E.
3. Urgent Care – The CCG want to increase the number of people with the condition who are able to manage their conditions themselves – at home!

Wolverhampton CCG believe by improving outcomes for people in these areas, we will have the best chance at improving the city's health overall and reducing the health inequalities that remain.

"No decision about you, without you"

When the NHS changes were announced by the government in 2010, a key commitment was made to patients in Wolverhampton. This was that the local NHS would make decisions that were informed by the views of local people. This means the NHS has to get much better at listening to patients' views and using these to influence the decisions it makes. The CCG have a comprehensive engagement framework that enables us to talk and listen to local patient and community groups. We value the time people take to tell us their views and we use the information we gather to help us:

- determine the health needs and wishes of local people;
- decide how we spend our money – including what we need to start and stop doing;
- monitor the quality of the services we commission;
- investigate concerns that people have raised through using services;
- ensure there are a range of ways patients can get involved;

Statement of commitment from the CCG

The CCG believes that equality and diversity should include addressing health inequalities as well as being embedded into all commissioning activity. Equality and diversity are central to commissioning plans, where everyone has the opportunity to fulfill their full potential. The CCG also believes that equality is about creating a fairer society and diversity is about recognising and valuing difference in its broadest sense.

46 GP practices in the city are members of the CCG and this provides the CCG with the opportunity to work with our patients to improve services and the overall health of the city. The CCG's GP practice membership will ensure the needs and priorities of our population are clearly identified and addressed by delivering the right care in the right place, at the right time by the right people.

"Right care, right place, right time within our financial envelope"

CCG Approach to equality

Wolverhampton CCG has committed to have due regard to the Workforce Race Equality Standard (WRES) and use it as a force for driving change, both as an employer and as a Commissioner of services.

The CCG will demonstrate its 'due regard' using a combination of activities. Due regard means that the CCG has given consideration to issues of equality and discrimination in any decision that may be affected by them. This is a valuable requirement that is seen as an integral and important part of the mechanisms for ensuring the fulfillment of the aims of anti-discrimination legislation set out in the Equality Act 2010.

Firstly, through its contracts with its providers, the CCG will seek assurance that there is evidenced compliance to Equality Act 2010 legislation. This is mainly achieved by Service Condition Section 13 of the NHS Standard Contracts, which sets out the requirements according to organisation type. Using Clinical Quality Review Meetings (CQRM) for larger organisations, the provider submits appropriate and relevant evidence that ensures assurance for the CCG. All providers are expected to demonstrate they understand their service users, workforce and race profile and have self-assessed against the WRES standards, the CCG will wish to see how the providers intend to implement the standard and what the impact will be on any key disproportionate representations of their service users and workforce.

Overarching activities of the CCG

Operating Plan

NHS Wolverhampton CCG 2015-17 operating plan represents the **second and third year** of delivering the Five Year Strategic Plan for Wolverhampton. The intent and strategic direction remains the same, though there are many new elements that shape the local landscape and the national picture:

- Approval of our Better Care Fund plans
- The Dalton Review
- The Five Year Forward View
- The 2014/15 Operating Plan was produced prior to agreement of our Five Year Strategic Plan

This plan demonstrates the CCG understands the borough it serves and what needs to happen to ensure their statement of commitment.

Governing Body

The CCG aims to commission the highest quality, evidence-based care on behalf of its patients by investing in skills available locally and otherwise to design new and improved care pathways. The mission of the CCG is:

We will be an expert clinical commissioning organisation, working collaboratively with our patients, practices and partners across health and social care to ensure evidence-based, equitable, high quality sustainable services for all our population.

Quality and Safety Committee

The Quality and Safety Committee (QSC) is established in accordance with paragraph 6.9.5(c) of NHS Wolverhampton Clinical Commissioning Group's constitution, standing orders and scheme of delegation. The QSC is accountable to the governing body and its remit is to provide the governing body with assurance on the quality of services commissioned and promote a culture of continuous improvement and innovation with respect to safety of services, clinical effectiveness and patient experience. It will deliver this remit in the context of the group's priorities, as they emerge and develop, and the risks associated with achieving them. The QSC has specific duties that includes - to monitor the group's delivery of the public sector equality duty (constitution 5.1.2(b));

Equality Impact Assessments (EIAs)

Delivering on equality and embracing diversity is only possible if we analyse the impact of services, policies, functions and decisions have on our communities and staff. Under the Public Sector Equality Duty of the Equality Act 2010, public services are required to analyse the impact on equality when exercising its functions. The equality analysis is important in order to consider the effect on different groups when decisions are made and identify practical steps to tackle any negative impact. The analysis helps public services to pay 'due regard' to the need to:

- Eliminate discrimination, harassment and victimisation
- Advance equality of opportunity between persons who share a relevant protected characteristic and those who do not share it
- Foster good relations between persons who share a relevant characteristic and those who do not share it

An EIA should be carried out from the earliest stages of consideration by the CCG to make any changes. It enables managers to address fundamental questions in considering and understanding how a proposal for healthcare changes, can help them to meet all customer requirements. It specifically seeks to address the following issues:

- Is there any direct discrimination?
- Is there any potential for indirect discrimination?
- What engagement has been carried out and who with?
- What was the outcome of any engagement and how has this informed the decisions made?
- Is any group disproportionately affected?
- What are the potential adverse impacts?
- What actions will be taken to mitigate any adverse impact?

This process has been embedded within the CCG's policy, practice and procedures from the scoping stage of commissioning. It has been and will be embedded in our work throughout 2015-17, so the CCG can scrutinise key changes in healthcare for any adverse impacts on local protected groups (both patients and staff). The CCG understand that EIAs supports them to consider protected groups in all of its planning and decision making processes, as required by the Equality Act 2010. The CCG undertake more detailed work to promote the use of EIAs for commissioned services, supported by relevant Health Impact Assessments and Health Equity Audits.

Equality Strategy and Equality Objectives

The CCG has a strategy and equality objectives for 2013 – 2017, due for a full review by October 2017. Equality and Diversity is central to commissioning plans, where everyone has the opportunity to fulfill their potential. The CCG strongly believes Equality is about creating a fairer society and Diversity is about recognising and valuing difference in its broadest sense. This strategy covers the relationships with service users, staff, and with other stakeholders. It builds upon the strong foundation for equality, diversity and human rights in the constitution and governance arrangements and it is key to how the CCG make decisions and how a contribution to strategic planning with partners is made. It sets out how the CCG will ensure equality considerations and valuing difference so that it becomes a systematic part of thinking, tone and approach. Our approach to equality and diversity will directly influence the relationships and transactions with individuals, groups and local communities; the way in which the CCG collects, analyses and interprets information and evidence; the collaborative arrangements with provider organisations; and finally the discipline adopted to reflect and consider if the CCG truly understand the consequences of their actions from the different perspectives of Wolverhampton people. This will apply particularly to those who are disadvantaged, vulnerable because of social determinants of ill-health. The current Equality objectives can be found on page 3 of this document. The equality objectives will not be 'static' for four years. They will evolve to stretch the ambition and achievements of the CCG.

Procurement

NHS Wolverhampton Clinical Commissioning Group (CCG) procures services from a range of providers. Contracts vary from small one-off purchases to large works or service contracts. When procuring services we ensure fair opportunity, competition and value for money. The form of procurement we use varies depending on the nature of the product or service being procured but can include Any Qualified Provider (AQP) competitive and non-competitive tendering. We follow public procurement regulations and guidelines when determining the form of procurement and approach. The regulations mean the CCG cannot favour providers simply because they are already in contract with us, an NHS organisation, located in our area, or employing local people. The CCG operate procurements in a fair and transparent way in accordance with the Principles and Rules of Co-operation and Competition published by the Department of Health. In line with the requirements set out in the Statutory Guidance for CCGs on managing conflicts of interest in CCGs published in July 2016 by NHS England, the CCG maintain a register of procurement decisions taken, which includes:

- the details of the decision;
- who was involved in making the decision;
- a summary of how any conflicts of interest in relation to the decision have been managed;

This enables the CCG to demonstrate that it is acting fairly and transparently and in the best interest of patients across Wolverhampton

Grading criteria

Essentially, there is just one factor for NHS organisations to focus on within the grading process. For most outcomes the key question is: **how well do people from protected groups fare compared with people overall?** There are four grades - underdeveloped, developing, achieving and excelling.

In response to the question how well do people from protected groups fare compared with people overall, the answer is:

- Underdeveloped if there is no evidence one way or another for any protected group of how people fare or ...
- Underdeveloped if evidence shows that the majority of people in only two or less protected groups fare well
- Developing if evidence shows that the majority of people in three to five protected groups fare well
- Achieving if evidence shows that the majority of people in six to eight protected groups fare well
- Excelling if evidence shows that the majority of people in all nine protected groups fare well

Grading

| Goal 1: Better health outcomes | | | | |
|--------------------------------|--|---|--|---|
| Grading | Undeveloped | Developing | Achieving | Excelling |
| | People from all protected groups fare poorly compared with people overall OR evidence is not available | People from only some protected groups fare as well as people overall | People from most protected groups fare as well as people overall | People from all protected groups fare as well as people overall |

| Goal 2: Improved patient access and experience | | | | |
|--|--|---|--|---|
| Grading | Undeveloped | Developing | Achieving | Excelling |
| | People from all protected groups fare poorly compared with people overall OR evidence is not available | People from only some protected groups fare as well as people overall | People from most protected groups fare as well as people overall | People from all protected groups fare as well as people overall |

| Goal 3: A representative and supported workforce | | | | |
|---|---|---|---|--|
| 3.1 : Fair NHS recruitment and selection processes lead to a more representative workforce at all levels | | | | |
| Grading | Undeveloped | Developing | Achieving | Excelling |
| | Staff members from all protected groups fare poorly compared with their numbers in the local population and/or the overall workforce OR evidence is not available | Staff members from only some protected groups fare well compared their numbers in the local population and/or the overall workforce | People from most protected groups fare well compared their numbers in the local population and/or the overall workforce | People from all protected groups fare as well compared their numbers in the local population and/ or the overall workforce |
| 3.2 The NHS is committed to equal pay for work of equal value and expects employers to use equal pay audits to help fulfill their legal obligations | | | | |
| | Equal pay audits show that staff members from all protected groups fare poorly compared with the overall workforce OR equal pay audits are not carried out | Equal pay audits show that staff members from only some protected groups fare as well as the overall workforce | Equal pay audits show that staff members from most protected groups fare as well as the overall workforce | Equal pay audits show that staff members from all protected groups fare as well as the overall workforce |
| 3.3 Training and development opportunities are taken up and positively evaluated by all staff | | | | |
| 3.4 When at work, staff are free from abuse, harassment, bullying and violence from any source | | | | |
| 3.5 Flexible working options are available to all staff consistent with the needs of the service and the way people lead their lives | | | | |
| 3.6 Staff report positive experiences of their membership of the workforce | | | | |
| | Staff members from all protected groups fare poorly compared with the overall workforce OR evidence is not available | Staff members from only some protected groups fare as well as the overall workforce | Staff members from most protected groups fare as well as the overall workforce | Staff members from all protected groups fare as well as the overall workforce |

Goal 4: Inclusive leadership

4.1: Boards and senior leaders routinely demonstrate their commitment to promoting equality within and beyond their organisations

| | Undeveloped | Developing | Achieving | Excelling |
|----------------|--|---|--|---|
| | There are no examples of a strong and sustained commitment | Only some of the examples show a strong and sustained commitment | Many of the examples show a strong and sustained commitment | All of the examples show a strong and sustained commitment |
| | 4.2 Papers that come before the Board and other major Committees identify equality-related impacts including risks, and say how these risks are to be managed | | | |
| Grading | None of the papers took account of equality-related risks and their management | Only some of the papers took account of equality-related risks and their management | Many of the papers took account of equality-related risks and their management | All of the papers took account of equality-related risks and their management |
| | 4.3 Middle managers and other line managers support their staff to work in culturally competent ways within a work environment free from discrimination | | | |
| | Staff members from all protected groups fare poorly compared with the overall workforce OR evidence is not available | Staff members from only some protected groups fare as well as the overall workforce | Staff members from most protected groups fare as well as the overall workforce | Staff members from all protected groups fare as well as the overall workforce |

As part of the management signing off process an assessment will be made for each outcome, according the grading information above. As EDS2 is not a self-assessment tool and performance should be assessed and graded by NHS organisations in discussion with local people and the workforce, that would part of the process would follow on from publication. The use of independent third parties to help with the assessment and grading is encouraged. Some NHS organisations have usefully turned to neighbouring NHS organisations for peer review. But other third parties such as local Healthwatch organisations and national bodies such as Stonewall and the Black and Minority Ethnic Health and Social Care network can also be used.

Equality Delivery System 2 (EDS2) Evidence Portfolio

1. Better health outcomes

The NHS should achieve improvements in patient health, patient safety and public health for all, based on comprehensive evidence of needs and results

1.1 Services are commissioned, procured, designed and delivered to meet the health needs of local communities

How does the CCG design/procure/commission services which are appropriate to its local population? Please give examples

| Protected characteristics | Equality objective | Human Rights | Evidence (What has actually been done/achieved?) | Impact | Grading [Date] |
|---|--|--|--|--|-------------------|
| Age Disability Gender Re-assignment Marriage & Civil Partnership Pregnancy & Maternity Race Religion or belief Sex Sexual Orientation | Objective 1 Objective 2 Objective 3 Objective 4 Objective 8 Objective 9 | Article 2 Article 3 Article 5 Article 8 Article 14 | <p>Wolverhampton CCG aims to provide more personalised care, closer to people's homes. To achieve this, the CCG has set out an ambitious five year strategy to modernise care and look at different ways to deliver services for less. It might take two, three or even five years to bring about this change.</p> <p>Unfortunately, Wolverhampton faces a more immediate problem. Our expected spend is increasing quicker than the money we are due to receive. While we should balance the books this year, next year will be very tough and we need to act now in order to continue commissioning safe, high quality care.</p> <p>In November, the CCG set up a group to look at our entire portfolio of services to ensure they deliver the best possible care and value for patients. The group, including members of the CCG's senior team, GPs, lay members and patient representatives, looks at modern models and pathways of care and will make recommendations where it feels care can be delivered differently.</p> <p>The CCG's Commissioning Intentions demonstrates how the CCG will commission, procure, design and deliver services to meet the health needs of the population it serves. It shapes the strategic direction for 2016/17 and 2017/18. The 'You said we did' demonstrates how the CCG involve and listen to the community - https://wolverhamptonccg.nhs.uk/contact-us/you-said-we-did</p> | <p>Services that deliver the best possible care and value for patients, that is personalised and within the community closer to patient's homes.</p> <p>To ensure the views of the population it serves is taken into account the CCG undertake very comprehensive engagement initiatives. Because of how the engagement is carried out specific views are taken into account and provide focus for key actions.</p> <p>By adopting a more integrated approach it is aimed to prevent people having unnecessary stays in hospital</p> <p>We are working with all providers to strengthen the service user and carers' voice across service re-design and delivery including evaluation of initiatives across the life span to develop self-efficacy and quality of life.</p> | |
| Age Disability Gender Re-assignment Marriage & Civil Partnership Pregnancy & Maternity Race Religion or belief Sex Sexual Orientation | Objective 1 Objective 2 Objective 3 Objective 4 Objective 8 Objective 9 | Article 2 Article 3 Article 5 Article 8 Article 14 | <p>Commissioning decisions and activity are informed by patient and public insight, experience and involvement in order to reduce health inequality and to drive improvement.</p> <p>The CCG's <i>Communications and Engagement strategy</i> is available to all staff and is used to inform commissioning work. For primary care specifically, public and patient insight is sought and used through the work of an operational group to support both the work of the <i>Joint Commissioning Committee</i> and to support the CCG's broader role in supporting quality improvement in Primary Care. This work is underpinned by patient feedback (range of sources i.e. surveys, expert patients, PPGs, complaints, compliments, engagement events) that is used to drive improvement. The CCG's approach is based on proactive engagement on a routine basis rather than as an afterthought. At present, more work needs to be done to link this work to Health inequalities and this will continue as the CCG moves towards delegated commissioning.</p> <p>a) The Governing Body receive a report on patient insight activity each meeting and all reports include details of patient and public involvement. Specific reports relating to individual pieces of work are presented as and when they take place.</p> <p>b) Patient and Public insight has been used to develop our Primary Care Strategy and is reported through our formal processes including the <i>Joint Assurance and Engagement Group</i> and <i>PPG Chairs meetings</i>, <i>Patient Partners forums</i> and <i>quality review work</i>. We are seeking to move to greater involvement for patients in our operational work through the development of a <i>Patient Reviewers programme</i> who will support our work monitoring quality.</p> <p>c) The CCG works closely with Public Health to develop an overall understanding of population needs and health inequalities via the JSNA. This includes evaluation of Patient and public insight but not necessarily in a structured way.</p> <p>d) Specific work has taken place to understand access to Primary Care through a structured survey. This formed part of the wider engagement work on the Primary Care Strategy which focusses heavily on population need i.e. health information, feedback from the community & practice understanding of need resulting in care closer to home, in the right place at the right time.</p> <p>e) The CCG works closely with Primary Care to develop mechanisms to gather patient feedback. In particular, the CCG supports the collection of data through the Friends and Family Test and is working closely with New Models of Primary Care delivery to ensure patient needs are at the heart of services. The CCG supports the development and effective operation of Patient and Participation Groups across Primary Care and has encouraged their involvement in the</p> | <p>Commissioners understand their organisation's strategic approach and therefore how and why the use of patient and public insight, experience and involvement reduces health inequality and drives improvement.</p> <p>Commissioners seek and gather patient and public insight and experience data in order to inform their commissioning decisions, activity and evaluation.</p> <p>Commissioners use patient and public insight, experience and involvement to identify and fully understand all health inequalities and inequities.</p> <p>Commissioners use patient and public insight, experience and involvement to inform the development of possible solutions, decisions and activity, in order to reduce health inequality and drive improvement.</p> | |

| | | | | |

It will describe how more services will be delivered locally, meaning more opportunities for GPs and specialist nurses offering specialist care in the community; as well as increasing job satisfaction it will help to attract the necessary health care staff to Wolverhampton that will be needed to provide this service. It will also mean patients will gain more support in their own community and homes with less hospital visits.</p> <p>https://wolverhamptonccg.nhs.uk/news/blogs/221-seamless-care-for-patients-thanks-to-new-strategy</p> | Integrated care | |
| Age Disability Gender Re-assignment Marriage & Civil Partnership Pregnancy & Maternity Race Religion Sex Sexual Orientation | Objective 8 Objective 9 | Article 2 Article 3 Article 5 Article 14 | <p>Urgent and Emergency Care Services - In summary, the plans describe how the many urgent and emergency care services will be brought together into a new purpose-built centre, based at New Cross Hospital which will be open all day, every day. This was successfully completed and opened in November 2015. The new Urgent and Emergency Care Centre building accommodates a number of services, including the new Emergency Department which was the first element of the urgent emergency care services.</p> <p>The second main element of the plans was the development of an Urgent Care Centre. The Walk in Centre at Showell Park and the GP Out of Hours Service came together to form the Urgent Care Centre based in the new Urgent and Emergency Centre on the first floor above the new Emergency Department in April 2016. This means that any patients who self-present to the Emergency Department will have the opportunity to speak to a nurse to determine if their care can be managed more appropriately in the Urgent Care Centre.</p> <p>https://wolverhamptonccg.nhs.uk/your-health-services/improving-urgent-care</p> <p>https://wolverhamptonccg.nhs.uk/news/193-improving-urgent-care</p> | <p>By centralising services in this way, we can help patients to access the right service at the right time.</p> <p>The new Urgent Care Centre will form part of the new Urgent and Emergency Care Centre currently being built at New Cross Hospital. Typically, it will provide treatment of minor injuries and illnesses for patients that do not require Accident and Emergency, but cannot wait until the next available appointment with their registered GP. The service will be provided to patients of all ages and cover conditions such as:</p> <ul style="list-style-type: none"> • minor burns and bites • fever and raised temperatures • sickness and vomiting • irritation and rashes • breathing difficulties • cuts and scrapes <p>A better use of resources.</p> | |

| Age Disability Gender Re-assignment Marriage & Civil Partnership Pregnancy & Maternity Race Religion Sex Sexual Orientation | Objective 4 Objective 5 | Article 2 Article 3 Article 5 Article 10 Article 14 | <p>Patient Participation Group (PPG) – ensures that the CCG listen to and engage with patients in the City, providing some assurance that the patient voice is included in all the work of the CCG and the patient viewpoint can be expressed at the Governing Body meetings. In order to do this we have an engagement framework to reach as many patient groups as possible. There are quarterly forums for PPG Chairs to meet and network - this is a good way for issues to be heard, not only about GP surgeries but other services too.</p> <p>Usually the practice manager starts the PPG by recruiting a <u>variety of patients</u> and holding a meeting to decide what direction the patients wish to take the group. A patient is usually elected chair and patients decide the agenda and eventually have ownership of the group.</p> <p>It's so important for patients, carers and public to be able to express their views on the health services available to them; even good quality services can be improved upon. These PPGs give vulnerable patients another voice – they can complete the PPG survey or contact the Chair directly and the issue is taken up by the group with the practice management or passed on to the relevant people.</p> <p>https://wolverhamptonccg.nhs.uk/news/blogs/190-blogs2</p> | Patient voice | |

4 Inclusive leadership

NHS organisations should ensure that equality is everyone's business with everyone taking an active role

4.1 Boards and senior leaders routinely demonstrate their commitment to promoting equality within and beyond their organisations

How has the CCGs senior management and governing body promoted equality throughout the organisation and the local health economy? Please give examples

| Protected characteristics | Equality objective | Human Rights | Evidence (What has actually been done/achieved?) | Impact | Grading [Date] |
|---|--|---|---|---|-------------------|
| Age Disability Gender Re-assignment Marriage & Civil Partnership Pregnancy & Maternity Race Religion Sex Sexual Orientation | Objective 1 Objective 4 Objective 7 Objective 8 | Article 2 Article 3 Article 8 Article 14 | <p>Leadership of WCCG agreed to, understand and promote their organisation's strategic approach to using patient and public insight, experience and involvement to reduce health inequality and to drive improvement.</p> <p>The CCG demonstrate evidence by;</p> <p>a) <i>Comprehensive Communications and Participation Strategy</i> details our approach in this area with the focus on how patient and public insight will drive quality. Future work will build on this to improve linkages to health inequalities</p> <p>Section 1 Section 3 Section 4 Section 6 Section 7</p> <p>b) Our operational arrangements detail that there will be a report on patient and public involvement to each meeting of the Governing Body. In addition, all reports to Governing Body and Committees include details of Patient and Public Insight activity and patient representatives sit on our <i>Quality and Safety, Commissioning and Primary Care Commissioning committees</i>. Communications & Engagement representatives attend <i>Programme Boards</i> and <i>Senior Management Team</i> meetings to ensure patient and public insight is considered throughout the project cycle and at senior levels. Key messages from patient and public insight are disseminated to all staff via staff meetings. The CSU <i>Communications and Engagement</i> lead is embedded in the Operations team and meets with the directorate management team weekly to provide updates on patient and public involvement. Regular operational meetings also take place with Governing Body Lay member, Associate Director of Operations, Chair and Communications & Engagement team</p> | <p>Leaders understand the strategic approach and therefore how and why the use of patient and public insight, experience and involvement reduces health inequality and drives improvement.</p> <p>Leaders are actively promoting the strategic approach and ensuring it is understood throughout the organisation</p> <p>The organisation has a documented, strategic approach describing how patient and public insight, experience and involvement is used to reduce health inequality and to drive improvement.</p> | |
